

The “World of WashTec” has everything for your success.

- **Comprehensive range:** The right solution for your washing business can always be found.
 - **Roll-over car washes** for low, medium and high washing volumes
 - **Conveyor tunnel systems** with modular design for all sizes and all requirements
 - **Commercial vehicle washes** for washing companies and in-house requirements
 - **Self-service washing equipment** with modular design for all needs and different location sizes
 - **Water treatment** – chemical-free and environmentally friendly
- **Service Support: 500 plus WashTec engineers throughout Europe** are in the field for you every day.
- **Tested quality** EN ISO 9001, 14001 certification – for your safety.
- **Reliable experience:** Innovative car washing technology for more than 40 years. **More than 2 million cars are cleaned in WashTec washing facilities every day.**
- **Value for money services:**
 - **Site analysis** for optimum sizing of your business
 - **Cost-effectiveness calculations** help with your planning
 - **Sales training for staff** increases revenue
- **Customized financing plans:** We will promote your business at fair conditions.

→ The Compact One

SoftCare Bravo

 **WashTec**

*The compact car wash for
lower volume applications.*

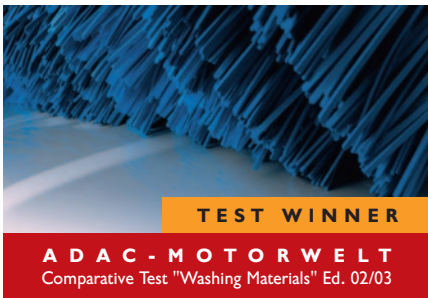

SoftCare Bravo

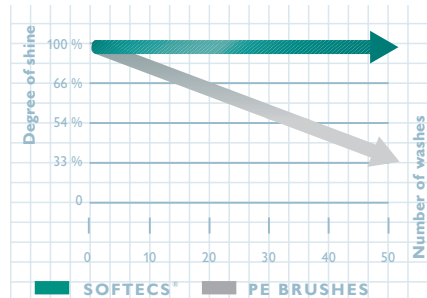

The SoftCare Bravo contains all the benefits you need for a profitable washing business in compact dimensions:

- Ideal for applications with 300 washes or more per month
- Top washing with optimum cost effectiveness
- Uncomplicated, compact system, also for smaller bays
- Low consumption and low maintenance cost

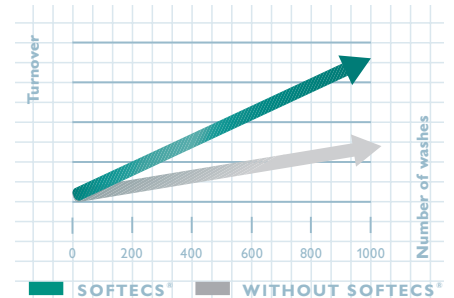

SofTecs® – get more from a technological and innovational edge.

↑ With SofTecs® you can win new customers, e.g. hand washers.

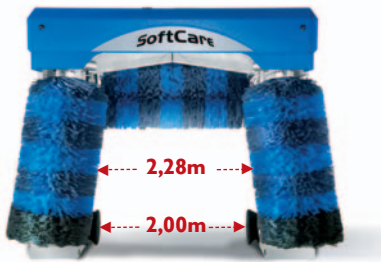

↑ SofTecs® washes gently without wearing. This retains shine and pleases even the most demanding of customers.

↑ More turnover through SofTecs®, since you can charge higher average prices because of the higher-quality wash.

Ideal dimensions for a profitable washing business.

↑ Modern dimensions match those of the latest vehicle models.

↑ Compact size for efficient performance with less space requirement.

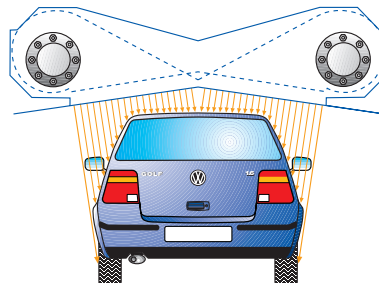

↑ Many different heights available. Utilisation of the existing full bay height creates more business potential.

The profit lies in the details.

↑ The integrated dryer saves energy costs thanks to the effective air flow.

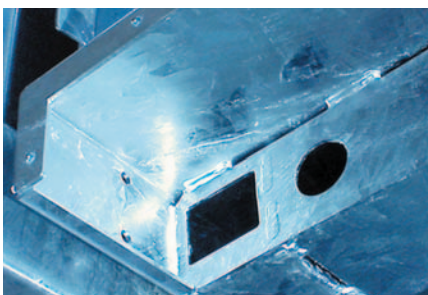

↑ Optimised flow concept: The powerful air flow at the sides means that water droplets are blown downwards away from the vehicle.

↑ Precise, and therefore economical brush wetting: spray tubes ensure that water, washing products and care products are used efficiently.

High quality for longevity and low-maintenance operation.

↑ High-quality frame: Fully galvanized steel structure for a long service life.

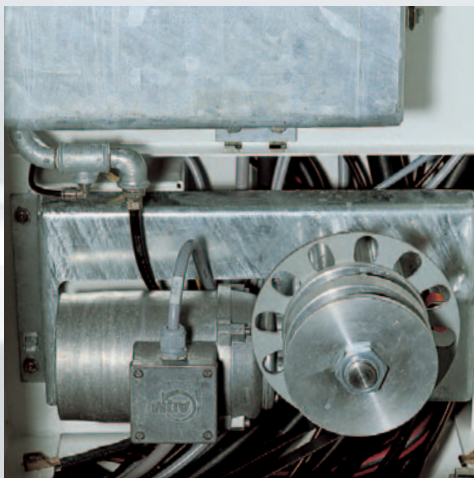

↑ The stable flat belt drives are maintenance-free and have an extremely long service life.

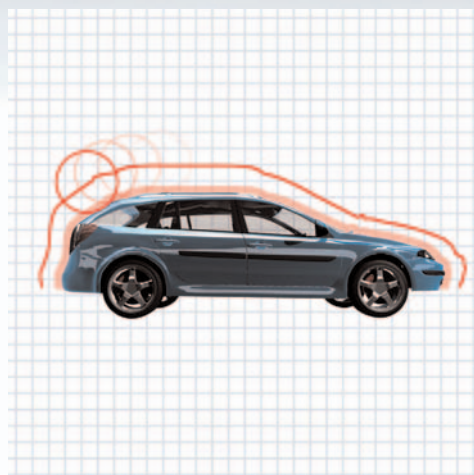

↑ Optimum protection from moisture damage: Hermetically sealed motors and encapsulated windings.

Technical advantages from which your business can only profit.

**Ideal speed –
more customer
confidence.**

↑ The travel and lift drives are **frequency controlled for a soft and smooth start** and **variable speed control**. There is less stress on the components, the machine runs smoothly and customers experience the gantry car wash as safer.

**Precise control –
contour-tracking
washing and drying.**

↑ The car wash is precisely and reliably controlled by a **modern microprocessor**. Intelligent operation: The control module **stores the vehicle contours during the first wash and uses them for drying**, therefore removing the need for additional light barriers.

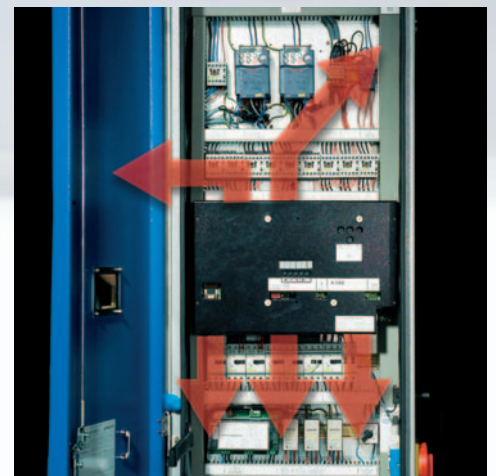

Adjustable side washers – complete wash, clean all over.

↑ The **side washers are positioned at an angle during the advance phase and are straight when the car wash reverses**. This provides an excellent washing result, whatever the shape of the vehicle.

Permanent self monitoring – reliable control.

↑ The machine **monitors the main components permanently**. Thanks to self-diagnostics, faults can be avoided before they happen, **thereby minimising downtimes**.

Your options for increasing business.

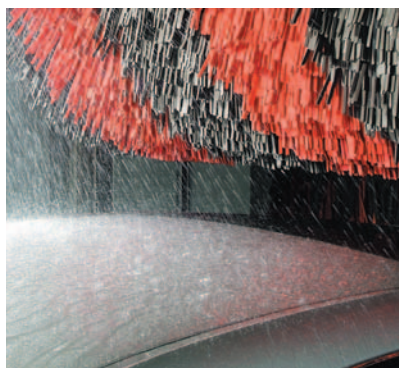

Gentle prewash – for the best washing result.

OUR TIP: Integrate the prewash in all your washing programs and increase your average wash price.

- Prewashing is needed, particularly when extremely dirty vehicles are being cleaned or SofTecs® is being used.
- Gentle removing of dirt using foam makes rinsing easier.
- Rinsing with high pressure is advisable after removing coarse dirt particles using lather. Choose between the extended solution of the all-round roof wash, or the cheaper side/front/rear system.

Waxing programs – look after the vehicles and the revenue will take care of itself.

- Vehicle care and preservation programs are extremely popular with customers and are therefore a key to more revenue and profit.
- Three different systems are available: cold wax, hot wax and foam wax.
- Osmosis rinsing helps to provide spot-free drying.

Wheel cleaning – your customers will appreciate it.

- Wheel washing brushes with a large diameter give even large wheels a thorough cleaning.
- Wheel spraying systems with special cleaner reduce stubborn dirt during prewashing.

Underbody wash – increase business by adding options.

- Popular service during winter and in the spring.
- A model that is sunk into the floor and a floor-mounted version are available. The latter is also easy to retrofit in existing bays. Both systems are available with segment control or swivelling tubes.
- Segment control allows short vehicles to be washed accurately and is therefore economical.

Modern dimensions – maximum business.

- The optimum dimensions of 3.10 m, 3.35 m and 3.60 m are suitable for many different bays.
- More business potential can therefore be exploited by utilising the existing bay height.
- Ideal washing heights of 2.30 m, 2.55 m, 2.80 m – always suitable for the latest vehicle dimensions.

Operating terminals – many variants with convenient use and added benefits.

- **Manual control:** Manual activation of car wash with choice of programmes.

- **Programme card reader unit:** Simple system with punched cards for the activation of single washes.

- **Transponder:** Versatile washing card reader with transponder technology for contact-free, wear-free reading. Single wash, multiple wash, value card function and happy hour function.

- **Code:** Activation of car wash with the code system. Code output device for cash office, code entry and activation via keyboard at car wash.
